

Commitment To Being A Responsible Global Citizen

Responsible global citizenship is informed compassion in action: making our best efforts to understand global issues, to act with sensitivity about them, and to change ourselves and our world for the better.

From local level financial sponsorship of junior sports clubs in Brisbane to the support of the Sea Shepard Conservation Society, State Emergency Services, and various other community organisations and charities, Telco Antennas attempts to contribute back to the global community where we can.

It is a policy of Telco Antennas to discount products and services whenever possible for volunteer/charity organisations. Telco actively seeks avenues where we can give back in some way to the communities that we operate in.
