

Tile Roof Mast Installation Guide

1. Unpack components + check the required installation tools.

2. Determine the location of mast.

3. Remove relevant roof tile and screw the mounting bracket to rafter.

4. Drill hole in roof tile to accommodate mounting bracket to penetrate.

5. Replace roof tile.

6. Repeat with other mounting brackets.

7. Thoroughly seal roof penetrations with the appropriate silicon.

8. Attach the mast base plate to mounting bracket.

9. Fix mast to baseplate with bolt, ensure mast is vertical.

10. Attach base of strut to mounting bracket.

11. Fix top of first strut to mast.

12.

If required, adjust strut tabs to suit.

13. Attach second strut to mast.

14. Mast Installation complete.

Refer to additional guides for antenna & equipment installation.
